Education

Lovely Professional University

Bachelor of Technology in Computer Science and Engineering

- Aptitude:** GRE Score: 324 (Quantitative Reasoning: 168).

Phagwara, Punjab

Expected June 2026

Narayana Junior College

Intermediate

Visakhapatnam

Percentage: 91.5%

Technical Skills

Cloud Platforms: Google Cloud (GCP), AWS (S3, IAM), Firebase Hosting

DevOps & Infrastructure: Terraform, Docker, Kubernetes, Linux, Shell Scripting, GitHub Copilot

Languages: C++, Java, JavaScript, C, Bash Scripting

Web Technologies: Node.js, Express.js, React, HTML, CSS

Databases: MongoDB, MySQL

Certifications

Oracle Certified Professional | Cloud Infrastructure 2025 Multicloud Architect

2025

Oracle Certified Professional | Cloud Infrastructure 2025 DevOps Professional

2025

Oracle Certified Professional | Cloud Infrastructure 2025 AI Foundations Associate

2025

Google Cloud Data Analytics Certificate | Google Cloud

2025

AWS Cloud Practitioner Essentials | Amazon Web Services

2025

Introduction to Containers w/ Docker, Kubernetes & OpenShift | Coursera

2025

Hands-on Introduction to Linux Commands and Shell Scripting | Coursera

2025

Projects

Secure Aadhaar Voting System | GCP, Node.js, MySQL, IAM

July 2025

- Architected and deployed a cloud-native voting platform on **Google Cloud Platform (GCP)**.
- Secured the database layer using Cloud SQL for MySQL with **IAM database authentication**, eliminating password-based security risks.
- Implemented server-side logic with **Node.js** to handle QR code generation and voter verification.

Compass AI Travel Planner | Flutter, Firebase Data Connect

Oct 2025

- Developed a mobile application to explore AI-powered travel itineraries using **Firebase Data Connect**.
- Integrated interactive maps using **flutter_map** and geolocator to display real-time trip locations.
- Configured Firebase backend and local emulators for seamless data flow and testing.

EcoRide Carpooling System | MongoDB, Express.js, Node.js (MEAN)

April 2025

- Developed a full-stack ride-sharing platform handling authentication and ride scheduling.
- Engineered the complete data flow connecting the Node.js/Express backend to the **MongoDB** database.
- Implemented secure user authentication using **bcrypt** for data protection.

Achievements

GDG Solution Challenge (National Finalist) | Top 3%

Oct 2025

- Selected as a **Top 105 Finalist** from 3,700+ competing teams for innovation and impact in a national project competition.

Problem Solving | LeetCode / GeeksForGeeks

- Solved **200+** coding problems, demonstrating strong analytical abilities and algorithmic skills.
